

In response to the issue facing the FCC regarding 24/7 recording of our broadcasts. This initiative would unduly penalize broadcasters throughout the country. It would force small market station like KDUH to spend money on equipment and labor that has nothing to do with improved service to the communities in our viewing area or our quality in broadcasts. In fact in the end it would force us to look at places to cut costs in other areas to comply with these new regulations. In the end I do not believe new regulations requiring us to record broadcasts 24/7 would serve the public good, it would only serve to penalize stations that are trying to serve the public good.
